EXECUTIVE SUMMARY

BACKGROUND

Benazir Bhutto Shaheed Human Resource Research and Development Board (BBSHRRDB) was established within folds of Government of Sindh with comprehensive and long-term vision to continue addressing the twin issues of poverty and un-employment.

BBSHRRDB (The Client) is running technical training programs in partnership with the private sector training service providers in the province of Sindh. All the training programs are subsidized by the Government of Sindh. The technical trainings are launched in batches for which payment is made to the trainees as well as training providers.

INTRODUCTION

The client sought services of Weitek Group (The Consultants) to carry out a third-party validation of Phase VIII – Batch I and Phase IX of the private sector training wing in order to verify primarily three aspects of the trainings namely (i) the level of curriculum attainment, (ii) Authenticity of external certificate authority and (iii) post training employment facilitation according to the specifications given in BBSYDP Program Guidelines. The objective of the assignment was to evaluate the eligibility of training providers for receiving the payment and final settlement of their dues.

METHODOLOGY

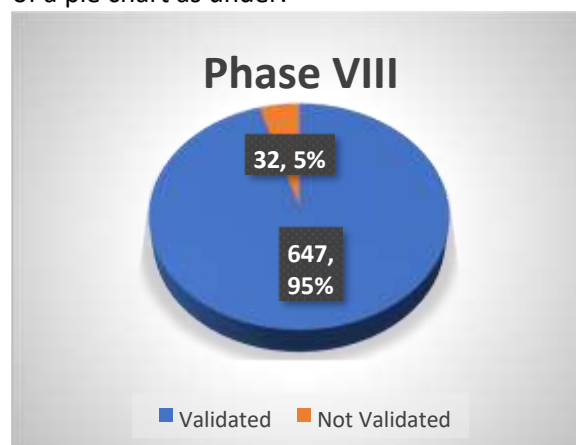

The third party validation exercise was designed on the basis of two types of verification methods, (i) Desk review and (ii) Trainees' interviews. A complete desk review was conducted on 100% basis to gather available documented information provided / collected by the partnered institutions (training service providers as well as the BBSHRRDB). The documented information was later verified by conducting telephonic interviews of a random sample of 40% of the trainees.

Following tables present an overview of the validation exercise for phase VIII:

Phase VIII		
Description	Number	Percentage
Trades offered by TSPs	679	100%
Trades Validated	647	95.3%
Trades not Validated	32	4.7%

Note: 32 trades could not be validated because their data was not validated due to the fact that these trades were either dropped or cancelled by the TSPs or the board respectively.

The above findings can be viewed in the shape of a pie chart as under:

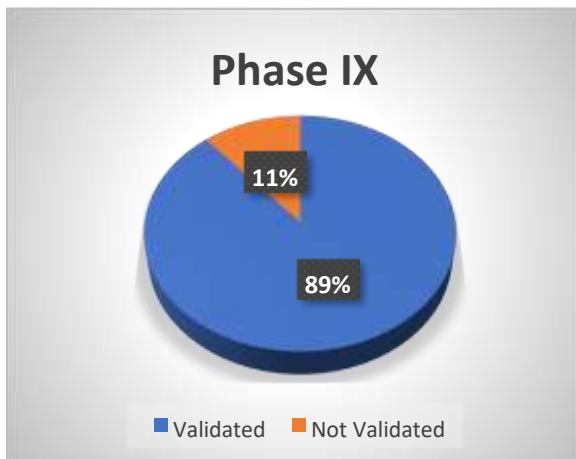

Following tables present an overview of the validation exercise for phase IX:

Phase IX		
Description	Number	Percentage
Trades offered by TSPs	895	100.0%
Trades Validated	794	88.7%
Trades not Validated	101	11.3%

Note: 101 trades could not be validated because 65 of them were reported as longterm trainings while 36 were either dropped or cancelled by the TSPs or the board respectively.

The above findings can be viewed in the shape of a pie chart as under:

The final outcomes of the validation exercise in terms of the number of trades found fully compliant with respect to the three factors stipulated by the TORs (i.e. (i) Course completion, (ii) Authenticity of the certificate and (iii) Facilitation for employment are concerned), are summarized in the following tables:

Phase VIII		
Description	Number	Percentage
Validated	647	100.0%
Fully compliant	413	63.8%
Non-compliant	234	36.2%

Phase IX		
Description	Number	Percentage
Validated	794	100.0%
Fully compliant	579	72.9%
Non-compliant	215	27.1%

The data presented to the consultants for desk review was further verified by triangulation with the results of the telephonic survey of a

total of 16311 trainees out of which 7701 were from phase VIII and 8610 belonged to phase IX. A summary of telephonic interviews conducted for the validation exercise is presented as under:

Description	Phase VIII	Phase IX	Total
Enrolled	21417	25581	46998
Valid contacts	17375	20648	38023
Interviewed	7701	8610	16311
Ratio	44.3%	41.7%	42.9%

KEY FINDINGS

During conducting interviews and desk review of data, following key findings were noted:

1. Majority of the trades offered by the TSPs (64% of active trades of phase 8 and 73% of active trades of phase 9) were found satisfactory
2. The information and source documents submitted by the training service providers were not systematically organized. Data was presented to the consultants in an unorganized form as a mix of both, hard and soft format.
3. There is no central database to maintain information submitted by the TSPs, the program officers were found maintaining the information about TSPs under their purview separate from each other.
4. Different formats / spellings of the names of institutes, districts and trades were noted during desk review which indicates lack of standardization and centralization of data. This situation causes anomalies and inconvenience while validating the information.
5. Information is collected on pre-printed forms during monitoring visits which induces the chances of human error.
6. Duplicate and invalid identification numbers and phone numbers were found

in the database of trainees which indicates the inability of software to keep a check on these key attributes.

7. Some aspects of the validation exercise such as certificate awarding status of the TSP and valid and unique CVs of trainers could be ensured at the time of contract awarding instead of postponing as a post awarding activity i.e. third-party validation.
8. Although it was not the part of interview guide to evaluate trainees' level of learning but some casual questions to a small sample of trainees indicated no or negligible level of understanding of the trade learned by the trainee.
9. In some cases, one phone number was used by multiple trainees registered with a TSP. The specified number sometimes, turned out to be of the TSP itself.
10. Although a small number but some trainees claimed to have received multiple trainings.

RECOMMENDATIONS

The consultants studied the program design and objectives. Moreover, an assessment of the effectiveness of the monitoring system / mechanism adopted by the Board for reporting the progress monitoring of training delivery was also carried out. As a result of the validation exercise, consultants have made following recommendations:

1. A standard method of data submission and document interchange may be followed instead of allowing the TSPs to submit information through email, WhatsApp and Courier.
2. An e-filing system may be introduced to facilitate online submission and archiving of the documents submitted by the training service providers.
3. The client may consider a one-time preregistration of the training service providers against which they would be required to submit proposals in each phase for the trainings they are interested in. This process will help assigning unique identification codes to each TSP.
4. Trainings (trades) should also be identifiable using unique codes assigned by the Board.
5. It is recommended to use tabs for recording data during progress monitoring visits to automate the process of data gathering and uploading on the server.
6. The MIS should not accept duplicate CNICs or phone numbers for the trainees.
7. A performance audit of the training service providers should be carried out for in-depth assessment of their actual capacity and resources.
8. The procurement process needs to be strengthened up for a vigorous evaluation of proposals submitted by the TSPs.
9. SMS broadcast system may be introduced to stay in contact with the trainees and to accept their feedback on time to time basis.
10. Only unique CVs of trainers should be accepted for different trades offered by the training service providers.
11. Trainers' registration may also be considered.
12. The client may consider officially seeking feedback of SBTE on the status of affiliation of the training service providers.
13. It is recommended to consider sustainable employment of the trainees for consideration of a TSP for the subsequent training contracts.
14. Strong industry linkages may be established to facilitate placement of trainees at suitable places.
15. An evaluation of the learning outcomes may be conducted on sample basis regularly or the same may be made part of the third-party validation.
16. The disbursement to the TSPs may be tied up with the outcomes of TPV as well as

results of the learning assessment of trainees.

17. Trainees already having completed a training may not be allowed to be registered in next course at least for a prescribed period of time.

18. Statistically valid sample may be considered sufficient instead of a wish for maximum coverage for next such exercises.

STUDY DESIGN

This chapter presents a brief about the technical details about the assignment and the way TPV has been carried out.

BACKGROUND

Benazir Bhutto Shaheed Human Resource Research and Development Board (BBSHRRDB) was established within folds of Government of Sindh with comprehensive and long-term vision to continue addressing the twin issues of poverty and un-employment.

The Board's main division Training Program and Curriculum, Benazir Bhutto Shaheed Youth Development Program (BBSYDP) is working since 2008-09. This program has trained approx. 292,000 literates, semi-literate and literate youth (18-35 years of age) including almost 168,000 females, in a number of employable trades, out of which almost 37% have received decent employment.

This training wing is working through two streams i.e. Private Sector Training Wing (PSTW) and Public Sector Training Wing (PS). For trainings under PSTW, the progress is measured in terms of achievement of milestones and fulfillment of contractual obligation by the contracted training providers. The said are validated through a Third Party Firm.

Training under Phase-VIII- Batch-I were conducted through 371 training institutes having approx. 21,453 registered trainees and Phase-IX covered 371 training institutes having an allocation of 27,000 youth. Board intended to contract with a Firm / Company / Organization for consultancy services - third party validation of BBSYDP training programs to verify smooth implementation of the program as per approved guidelines, and to facilitate BBSYDP in validation of minimum 40% post training employment facilitation by training providers.

The duration of this Consultancy was one year extendable or till completion of assignment, subject to the availability of funds, and satisfactory performance.

SCOPE OF WORK

The scope and extent of the Third Party Validation (TPV) is to identify strengths and gaps in implementation and monitoring of the training program in PSTW - Phase-VIII Batch-I and Phase-IX.

Consultant reviewed that the contracted training institutes are working in accordance with the scope and description of services agreed with the PA.

Above and beyond, scope of work covers inception meeting to review the available documents and relevant background information and discuss the process of validation and finalization of work plan, also to finalize and agree on the roles and responsibilities of focal points from both the parties.

The final work plan and schedule of deliverables were submitted by the consultant within ten days after signing of contract.

This exercise involved the following;

- (i) deployment of suitable staff for validation & post training employment verification
- (ii) understanding of overall design & objectives (iii) ascertain the level of curriculum attainment
- (iv) validation of external certificate authenticity
- (v) verification of post training employment facilitation according to the specifications given in BBSYDP Program Guidelines
- (vi) recommending specific remedial measures to achieve the required standards (vii) submission of periodic deliverable progress reports.

DELIVERABLES

- Firm was required to develop a methodology with a predetermined time frame for completion of each component to be validated; as all the three components require varied time to be completed; for independent validation of training delivery to the utmost level of required specification. While devising the methodology, methods for data collection and analysis are to be selected and detailed.
- The consultants deployed a technical team with ample skills for third party validation exercise.
- The consultants are presenting validation findings and an analysis of the external and internal contexts that could impact achievement of the planned results and have identified practical lessons and recommendations to facilitate BBSHRRDB to improve existing practices in the training delivery.
- The consultants have also assessed the effectiveness of the monitoring system / mechanism adopted by the Board for reporting the progress monitoring of training delivery by reviewing available progress monitoring reports (PMRs) and having one on one discussion with the R&D officer and program officers.
- For validation of the curriculum completion and status of employment, the Consultant determined the sample of the total graduated trainees of the batch / phase to make a telephonic call, this sample was approximately 43% of the total valid / contactable number of trainees, the sampling strategy and method is detailed in this chapter of the report.
- Consultant submitted periodic reports on the assignment and got the feedback on each, before submitting this Final Draft Report. This report integrates the feedback of the PA, entire evaluation i.e. ascertainment of the level of curriculum attained, validation of external certificate authenticity, verification of post training employment facilitation according to the specifications given in BBSYDP Program Guidelines, Identification of key learning and action points and recommending corrective measures; highlighting key achievements. A complete database in excel for all TPV components and an executive presentation is also ready for submission.
- The firm also submitted following progressive periodic deliverable reports for review to the client during the course of assignment:

- (i) **Inception Report:** Outline of overall methodology to be used, detailed staff provision, work plan, monitoring and evaluation strategy.
 - (ii) **Data Collection Instruments:** Formulation of survey manual and questionnaires to be used for data collection.
 - (iii) **Report on Desk Review:** An interim report on the outcomes of desk review of the available documents.
 - (iv) **Draft Survey Administration Report:** A report on completion of data collection activities (telephonic survey) executed for TPV of:
 - a. Curriculum attainment
 - b. Certificate verification
 - c. Employment verification
- This **Draft Final Report** is a consolidated report presenting the outcomes of TPV activities (curriculum attainment, certificate verification and employment verification) segregated on district, institute and trade.

METHODOLOGY

This exercise involved the following:

- validation & post training employment verification
- understanding of overall design & objectives • ascertain the level of curriculum attainment
- validation of external certificate authenticity
- verification of post training employment facilitation according to the specifications given in BBSYDP Program Guidelines
- recommending specific remedial measures to achieve the required standards • submission of periodic deliverable progress reports

Training under Phase-VIII Batch-I (completed batch with approx. 362 training institutes having approx. 21,417 registered trainees) and Phase-IX (ongoing training with approx. 380 training institutes having approx. 25,581 registered trainees from an allocation of 27,000 youth).

SAMPLE SIZE

According to the TORs, the focus for the assignment is Phase-VIII and Phase-IX training providers as well as graduate trainees selected from 29 districts of Sindh. Accordingly, following sample was mutually agreed for the study after consultation with the client:

- The **desk review** was conducted for all the 380 training providers (Approx.) offering total of 1441 trainings (679 trainings under phase 8 and 895 trainings under phase 9). So complete population or **100%** sample was validated for curriculum achievement, certificate authenticity and employment facilitation.
- 40% of graduate trainees from each district was to be sampled for **telephonic interviews** in compliance with the TORs, to ascertain the level of attainment of curriculum as well as to

validate the employment facilitation in accordance with the defined modes in PGL. After completing the survey, it turned out to be **43%** of the trainees with valid contact numbers.

WORK PLAN

A detailed work plan was proposed by the consultants and the same was fine-tuned during the inception phase. It was made part of the inception report shared with and approved by the client. A copy of the work plan has been attached with this report as Annex-A: Work Plan.

TIME LINE

All the important information and key dates (milestones) related to the assignment have been summarized in the following table:

Description / Milestone	Data / Date
Title of the project	Third Party Validation of the results achieved under the training program Phase-VIII and Phase-IX, Private Sector Training Wing, BBSYDP / BBSHRRDB
Client	Benazir Bhutto Shaheed Human Resource, Research and Development Board
Consultants	Weitek Group
Duration of the project (as per TORs)	One Year
Contract signed on	11 May 2017
Project completion date (as per contract)	30 April 2018
Inception meeting held on	12 May 2017
Indicators for desk review submitted	29 July 2017
Desk review initiated	31 July 2017
Submission of proposed survey instrument	26 July 2017
First round of desk review completed	31 August 2017
Approval of survey instrument	06 Oct 2017
Telephonic survey initiated	16 Oct 2017
Submission of interim report	03 Jan 2018
Completion of second round of desk review	18 Jan 2018
Completion of telephonic survey	01 March 2018

Submission of survey administration report	15 March 2018
Submission of findings of TPV	15 March 2018
Initiation of re-collection of data about noncompliant trades	16 March 2018
CD containing last chunk of data received	30 March 2018
Completion of last round of revisions	04 April 2018
Submission of final deliverable	14 April 2018
Deviation from contracted completion date	NIL

OUTCOMES OF THE VALIDATION EXERCISE

The validation exercise was carried out in accordance with agreements made between the consultant and the client and were documented as part of the inception report as well as notes shared later on. There were 3 broad domains of the TPV namely (i) Validation of curriculum achievement by TSPs, (ii) Validation of authenticity of certificates issued by the TSPs, and (iii) Validation of employment facilitation extended by the TSPs to the trainees.

A list of indicators to validate the three aspects was devised in consultation with the client. The list is present as under:

1. Total Trainees
2. Trainers' CVs
3. Training Plan
4. Course Outline
5. Test Papers
6. Course Completion Report
7. Course Completion Status (as per last CCR)
8. Certificate Issuance (Sample / Photocopy)
9. Certificate Distribution (Pictures)
10. Affiliation Certificate / Letter
11. Employment Status (No. of Trainees Employed)
12. Date of Last Progress Monitoring Report (PMR)

Following agreements were made during a meeting held at BBSYDP office on 18th December 2018 with respect to the threshold limits for the TPV indicators:

1. Trainers' CVs: Availability of trade wise segregated CVs will be ensured.
2. Training Plan: Training plans for all the trades will be arranged.
3. Course Outline: Missing course outlines will be placed in files.
4. Test Papers: Availability of at least one copy of test papers will be ensured.
5. Course Completion Report: Missing reports will be arranged.

6. Course Completion Ratio (from last PMR): At least 75% course coverage as per last Progress Monitoring Report will be considered sufficient.
7. Sample / Copy of Certificate: A copy or sample of certificate will be arranged for every trade.
8. Picture of Certificate Distribution: Pictures from training provider will be considered sufficient for all of the trades offered by the same institute.
9. Affiliation Certificate / Letter: Certificate issued by STEVTA, SBTE, STTB or chartered institutions are acceptable only. Certificate issued by the training institute will be accepted only if it is a chartered institution. BBSYDP was requested to share the list of training providers which are themselves chartered / approved to issue the certificates.
10. Affiliation Validity (date): Certificate will be acceptable if the letter is valid at least upto the course completion date. Client was requested to share the course completion dates for all the trades to ensure validation of this indicator.
11. Employment Status: 40% of the students of all trades combined (those have completed their course) from an institution will make it eligible to be cleared in validation. Moreover, a provision will be kept to consider those trainees as employed who are continuing their education.

TOOLS USED FOR VALIDATION EXERCISE

DESK REVIEW

The consultants developed an automated worksheet using MS-Excel as the document review tool to evaluate and validate the performance based on available documents for each TSP. The indicators used for such activity have been presented in the previous section of this report. An in-depth review was carried out for all the identified documents for all the institutes and trades they were offering on 100% basis without drawing any sample. All the documents were critically inspected in multiple rounds. It is pertinent to note here that consultants had to request for missing documents multiple times and the same were arranged in multiple batches. In spite of multiple attempts to procure all the required documents, there are still 15 trades for which no document could be made available. 10 out of these 15 trades belong to phase 8 while 5 are from phase 9. Kindly see the next sections for the outcomes of different components of the validation exercise.

The automated worksheet was also linked with a summary report which was programmed to automatically update itself so that results could be shared with the client on daily basis. The summary as well as detailed proceeds were shared with the client as and when required and the process was recurring on daily basis during the second half of the desk review exercise.

TELEPHONIC INTERVIEW

The consultants devised a structured questionnaire to facilitate interviewing the sampled trainees in order to receive their feedback with respect to the three assessment areas. The questionnaire was divided into four sections namely (i) Basic Information, (ii) Training Completion, (iii) Certification, and (iv) Employment Status. The questionnaire went through some revision rounds and finally got approved by the client for usage in conducting the interviews. See Annex-B: Survey Instrument to have a look at the questionnaire.

A data automation software was also developed on the basis of approved survey instrument to facilitate the team of interviewers in recording the interviewees' responses.

The interviewing team was offered One day training about the usage of software and the interviewing protocols prior to begin the survey. A survey manual was prepared for the interviewers to understand

the objectives of the assignment as well as their role and responsibilities. The trainer conducted the comprehensive training on the basis of this document. See Annex-C: Survey Manual for the details.

It is pertinent to note here that the team had to attempt contacting all the respondents on 100% basis multiple times in order to achieve the sampling target of 40% assigned by the client. Therefore, it is suggested that statistically sufficient size of sample may be considered in the next such exercise.

RESULTS OF DESK REVIEW (PHASE 8)

During this activity a desk review of the documentation related to all 679 trades was carried out by the validation team under Phase VIII (Batch I) PSTW. 32 trades out of the 679 were reported as dropped or cancelled. Therefore 647 trades from phase 8 were finally considered for detailed assessment and reporting. Following table presents a district wise summary of the outcomes of the exercise:

Sr.#	District	Total Trades	Complete Data Provided	Incomplete Data Provided	All Data Missing	% of Data Available	100% Compliant Trades	
							Nr.	%age
1	Badin	33	19	10	4	72.9%	14	42.4%
2	Dadu	24	11	13	0	73.2%	9	37.5%
3	Ghotki	31	27	4	0	91.7%	15	48.4%
4	Hyderabad	35	26	9	0	91.8%	29	82.9%
5	Jacobabad	35	35	0	0	100.0%	24	68.6%
6	Jamshoro	14	12	2	0	95.4%	6	42.9%
7	Karachi	24	13	9	2	66.7%	10	41.7%
8	Karachi-Central	5	5	0	0	100.0%	5	100.0%
9	Karachi-East	25	15	8	2	77.1%	7	28.0%

27	Tharparkar	5	5	0	0	100.0%	5	100.0%
28	Thatta	5	3	2	0	90.0%	3	60.0%

29	Umerkot	10	10	0	0	100.0%	10	100.0%
30	Sujawal	0	0	0	0	-	0	-
Total		647	497	136	14	88.5%	413	63.8%

Kindly see Annex-D: TPV Results of Phase VIII for a trade wise detail of the outcomes of TPV exercise.

RESULTS OF DESK REVIEW (PHASE 9)

During this activity a desk review of the documentation related to all 895 trades was carried out by the validation team under Phase IX PSTW. 101 trades were reported as dropped / cancelled or longterm courses. Therefore, 794 trades from phase 9 were finally considered for detailed assessment and reporting. Following table presents a district wise summary of the outcomes of the exercise:

Sr.#	District	Total Trades	Complete Data Provided	Incomplete Data Provided	All Data Missing	% of Data Available	100% Compliant Trades	
							Nr.	%age
1	Badin	21	17	4	0	96.3%	17	81.0%
2	Dadu	30	20	10	0	85.7%	20	66.7%
3	Ghotki	56	54	2	0	99.4%	31	55.4%
4	Hyderabad	49	48	1	0	99.7%	42	85.7%
5	Jacobabad	22	20	2	0	98.4%	18	81.8%
6	Jamshoro	13	5	8	0	84.6%	7	53.8%
7	Karachi	5	1	4	0	31.4%	1	20.0%

30	Sujawal	7	7	0	0	100.0%	7	100.0%
Total		794	676	111	7	93.1%	579	72.9%

Kindly see Annex-E: TPV Results of Phase VIII for a trade wise detail of the outcomes of TPV exercise.

RESULTS OF TELEPHONIC SURVEY (PHASE 8)

During this activity all the 17375 trainees having valid contact information were attempted to be reached over the phone for an interview. However, after multiple attempts, 44.3% of them i.e. 7701 could be interviewed because others could not be contacted due to multiple reasons including, invalid phone number, number not in use, phone not picked, someone else using the number, etc. Following table presents a district wise summary of the outcomes of the exercise:

District	Valid Contacts	Interviewed	Ratio
Badin	484	222	45.9%
Dadu	598	265	44.3%
Ghotki	727	303	41.7%
Hyderabad	994	467	47.0%
Jacobabad	708	336	47.5%
Jamshoro	330	146	44.2%
Karachi	3667	1608	43.9%
Kashmore @ Kandhkot	199	84	42.2%
Khairpur	1395	606	43.4%
Larkana	2092	914	43.7%
Matiari	197	85	43.1%
Mirpur Khas	611	266	43.5%
Naushahro Feroze	651	283	43.5%
Qamber @ Shahdadkot	946	409	43.2%

Sanghar	316	155	49.1%
Shaheed Benazirabad	932	426	45.7%
Shikarpur	469	207	44.1%
Sukkur	785	346	44.1%
Tando Allahyar	498	207	41.6%
Tando Muhammad Khan	365	158	43.3%
Tharparkar	70	32	45.7%
Thatta	97	41	42.3%
Umerkot	244	135	55.3%
Grand Total	17375	7701	44.3%

Kindly see Annex-F: Survey Results of Phase VIII for an institute / trade wise detail of the outcomes of TPV exercise.

RESULTS OF TELEPHONIC SURVEY (PHASE 9)

During this activity all the 20648 trainees having valid contact information were attempted to be reached over the phone for an interview. However, after multiple attempts, 41.7% of them i.e. 8610 could be interviewed because others could not be contacted due to multiple reasons including, invalid phone number, number not in use, phone not picked, someone else using the number, etc. Following table presents a district wise summary of the outcomes of the exercise:

District	Valid Contacts	Interviewed	Ratio
Badin	498	204	41.0%
Dadu	561	235	41.9%
Ghotki	1264	531	42.0%
Hyderabad	1505	630	41.9%
Jacobabad	517	215	41.6%
Jamshoro	288	121	42.0%
Karachi	5204	2169	41.7%
Kashmore @ Kandhkot	74	31	41.9%

Khairpur	2298	951	41.4%
Larkana	1915	793	41.4%
Matiari	189	79	41.8%
Mirpur Khas	383	161	42.0%
Naushahro Feroze	601	249	41.4%
Qamber @ Shahdadkot	820	349	42.6%
Sanghar	691	287	41.5%
Shaheed Benazirabad	655	274	41.8%
Shikarpur	242	101	41.7%
Sujawal	173	73	42.2%
Sukkur	1471	619	42.1%
Tando Allahyar	277	116	41.9%
Tando Muhammad Khan	275	113	41.1%
Tharparkar	170	69	40.6%
Thatta	194	81	41.8%
Umerkot	383	159	41.5%
Grand Total	20648	8610	41.7%

Kindly see Annex-G: Survey Results of Phase IX for an institute / trade wise detail of the outcomes of TPV exercise.

VALIDATION CLOSURE

The findings of the validation were officially shared with the client in the shape of an Excel sheet on 15th March 2018 and comments / additional documents were received from the period beginning 16th March 2018 upto 30th March 2018. Based on management comments / additional documents provided, the findings were revised and the final draft of the report is being presented. However, consultants may consider revising the findings again in consultation with the client in case of need. This report is also accompanying the PowerPoint presentation and data sheet stored in the attached compact disk.

ANNEXURES TO THE REPORT

ANNEX-A: WORK PLAN

This section covers the structured methodology, step by step, in the order in which Weitek Group plans to conduct the TPV. This detailed methodology shall ensure smooth and timely execution of the project and shall also provide basis of monitoring the project at any given point in time.

Considering the nature and requirements of the assignment, it has been envisaged that the assignment might involve some desk study as well as survey based validation and qualitative analysis; therefore, we have a plan to adapt a structured approach combining the best features of various possible methodologies devised by the experts and successfully practiced at international level. We anticipate that various fact finding tools will need to be used including but not limited to:

- Desk Review
- Questionnaire for telephonic interview

The entire project has been divided into easily manageable phases / stages as per needs of the assignment. So, the whole process has been split into four phases i.e. (i) Inception, (ii) Planning and Design, (iii) Execution and (iv) Reporting. Constraints are also evaluated with the objective of completing the assignment well within the given time frames.

The slacks or slight adjustments have already been accounted for. The plan is flexible enough to absorb usual delays without affecting the completion period and major milestones. So, there is a remote chance of milestone slippage.

Our methodology ensures completion of the deliverables within targeted time to assure successful completion of services. Our anticipated project lifecycle includes the following:

PHASE 1: INCEPTION

The project activity has been initiated with formal meeting with the Client and initial meetings with the key stakeholders including officials from BBSYDP and the relevant program management and implementation units.

In this regard, the consultants had detailed meetings with following key persons:

- Mr. Shariq Ahmed, Secretary BBSHRRDB
- Mr. Sharif Sheikh, Provincial Coordinator
- Mr. Khan Muhammad Tunio, Deputy Provincial Coordinator
- Ms. Masooma Rizvi, Research and Development Coordinator
- Mr. Tariq Ali, Deputy Director (Procurement)

Mr. Khan Muhammad Tunio and Ms. Masooma Rizvi was identified as key focal persons. However, during later exchange of online and voice conversations, on the recommendation of Ms. Masooma, it was decided that Mr. Khan Muhammad Tunio will be the key focal person on client's behalf to steer the assignment and coordinate with the consultants.

Detailed methodology has been discussed during inception. It Includes procurement of available material, the survey design methodology and detailed work plan.

A list of data and documents for an initial desk review has been shared with the client and the material is expected to be shared by the client soon.

PHASE 2: PLANNING AND DESIGN

Upon approval of the inception note, we will begin with the next stage of Planning and Design, which will include overall planning of all activities including procurement of required reports and other documents, preparation of fieldwork schedule, devising a logistical plan, etc. This entire exercise will be subject to the approval of the client. The details of all the activities to be carried out in this phase are listed below:

Planning the Desk Study

- Preparation of a list of documents and reports required by the consultant for desk study, review and analysis.
- Procuring all the relevant documents from the concerned departments / stakeholders.
- Sampling the agreements, progress reports, completion reports, training reports, etc. for carrying out an in-depth desk review. The total number of training providers for phase 8 and phase 9 are 742 and the minimum sample size for a desk review (at 5% response distribution, 5% margin of error and 95% confidence level) comes out at selecting 67 files. However, we have agreed on client's request to cover **100% institutes and trades for the desk review** both for phase 8 and 9.

Survey Planning

- Building operational team of appropriate size having suitable skill matrix.
- Preparing a comprehensive telephonic interviewing plan
- Devising an efficient and effective communication plan

Survey Instrument Designing & Translation

- Formulation of instruments (interview guidelines, survey questionnaires, checklists, monitoring instruments, etc.).
- Formatting of instruments to make it user and reader friendly.
- Drafting and translating field survey manual(s) / handout(s) / guideline(s).
- Organizing appropriate trainings for the interviewers and evaluating their understanding. Comprehensive initial and ongoing trainings will be conducted by the consultants.
- Development of quality control protocols and procedures for field survey and data entry.
- Development of computerized validation programs for checking the validity and consistency of data.

PHASE 3: EXECUTION

This phase will comprise of three main activities i.e. Desk Study & Review, telephonic interviews and Field Survey Administration (wherever required). To begin with this phase, the consultants will contact the representative(s) of the BBSYDP and other important personalities to get maximum cooperation during the actual field work and to reduce the chances of non-responsiveness.

Monitoring system will be evaluated through process mapping, structured walk through and face to face interview with provincial level program officials. CCR of Phase 8 and last PMR of phase 9 will be reviewed for the training providers. A provision to visit a couple of sites has been kept as a contingency only.

The most critical and time taking activity in the phase will be to collect firsthand information from the graduate trainees through personal telephonic interviews for which pre-designed questionnaires will be used as fact finding instruments. Keeping in view the importance of the assignment, this phase will be critically focused and the performance of every team member will be monitored on daily basis. The staff, under the supervision of respective Manager, will be mobilized to undertake the survey activity according to the approved plan. The monitoring system will be evaluated through process mapping, structured walk through and face to face interview with provincial level program officials.

CCR of Phase 8 and last PMR of phase 9 will be reviewed for sampled training providers. Details about different activities of this phase are listed below:

Desk Study and Review

- Structured approach (using computerized checklist) shall be followed in order to extract required information from the documents procured from BBSYDP and other concerned authorities / officials. In this regard, a compliance checklist will be prepared using spreadsheet software.
- The consultants shall carry out an implementation process mapping.

Data collection from the respondents

- The interview teams shall follow each survey instrument in the manner in which it is intended. Three main data collection methods shall be used as under:
 - Face to face interviews from provincial program authorities.
 - Telephonic interviews from trainees
 - Collection of documents from training providers through courier
 - Procurement of documents from the board through e-mail, web, courier and by hand.
 - An activity log shall be maintained for each activity performed by the team members working in the field as well as at the office, answering all questions therein and emailing the same to the main office on daily basis.
- It shall be ensured that quality control measures for data collection are applied at all locations.
- **The survey team shall:**
 - Fully abide by the principles, regulations, and policies which apply to research involving human subjects. In addition, fully abiding with all safeguards for research of vulnerable groups such as women, children and economically or educationally-disadvantaged persons.
 - Take appropriate measures to guard against the risks of invasion of privacy and breach of confidentiality. Follow all standard requirements for obtaining and documenting informed consent from each prospective subject.
 - Notify the client, as soon as safety permits, of any security threat encountered during the course of field work, including, but not limited to, direct threats to the survey team, generalized threats during the course of field work, and spontaneous occurrences of insecurity during fieldwork or travel.

Data Entry

Appropriate data automation / productivity tools such as spreadsheet applications or database management systems will be used for data automation. Separate data entry formats will be used for the survey questionnaires checklists or other instruments as needed.

Prior to initiating the exercise, training will be provided to the Data Entry Operators. The training will include complete data entry process, understanding quality control protocols, maintaining data entry log, etc.

PHASE 4: REPORTING

This phase is meant for preparation of a TPV report and its presentation to the client. According to our understanding, the report must include quantitative /statistical analysis and it will be ensured that the following documents should also be provided to the client for reference and record:

- All survey instruments and manuals prepared or revised by the firm.
- Quality control plans for survey and test data collection and data entry.
- TPV Report (Draft and Revised).
- Survey and test data in MS-Access / MS-Excel for all TPV components.
- Project Completion Report with analysis of findings from the TPV exercise.

ANNEX-B: SURVEY INSTRUMENT

THIRD PARTY VALIDATION OF BBSYDP TRAINING PROGRAM
FOR PHASE VIII AND PHASE-IX (PSTW)

QUESTIONNAIRE FOR TRAINEE

My name is _____ . We are conducting a study about BBSYDP training program launched by the Government of Sindh. We would like to ask a few questions about the training. It will take about 5-10 minutes. We shall be grateful for your time and cooperation. Your answers will only be known by researchers on this project; they will not be shared with others.

May we begin the interview? 1 Yes [Proceed] 2 No [In case of 'No' repeat with next respondent]

SECTION 1: BASIC INFORMATION

Date: / / 2 0 1 7 Time: : :

District: Taluka:

What is your Name?

What is your Father's Name?

Gender: 1 Male 2 Female CNIC: - -

What is phone number? 0 3 -

What was the name of Training Institute?

What was the name of Trade?

SECTION 2: TRAINING COMPLETION

- When did you complete the training? Month: Year:
- What was the duration of training? Months:
- Approximately how many lectures were actually conducted?
- Are you satisfied with the quality of training? 1 Yes 2 No
- Were you provided with the course outline? 1 Yes 2 No
- Is this training experience useful in your work? 1 Yes 2 No

SECTION 3: CERTIFICATION

- How many tested were conducted during training?
- Did you take final exam at the end of the training? 1 Yes 2 No
- Have you received certificate from the institute? 1 Yes 2 No
- Is your certificate endorsed by any certification authority i.e. STTB, SBTE, STEVTA etc.? 1 Yes 2 No

SECTION 4: EMPLOYMENT STATUS

- Were you offered a job after the training? 1 Yes 2 No (Skip to Question No.4)
- What is the status of the job you have been offered?
1 I have declined 2 Not yet joined 3 I have joined 4 Other, Specify _____
- What is the reason for not joining?
1 Salary too low 2 It is too far 3 Designation is not good 4 Organization is not good 5 Job not relevant to course 6 I want to study further 7 Shall do my business 8 I need to stay at home
- What kind of facilitation is offered by the institute to all the trainees in finding jobs?
1 None 2 Job ads are place on noticeboard 3 They put the ads on web 4 They arrange jobs through their linkages 5 They provide a list of employers 6 Other, Specify _____

Thank you very much for your time and cooperation. Good bye (end interview)

SURVEY MANUAL

“Third Party Validation of the results achieved under the training program Phase-VIII and Phase-IX, Private Sector Training Wing, BBSYDP/BBSHRRDB”

The interview based survey is one of the methods of collecting primary data directly from the beneficiaries or key stakeholders. Rather than asking respondents to read questionnaire and enter their own answers, interviewers are engaged to ask the questions orally and record respondent's answers. Interviewing is typically done in a face to face meeting but in case of large number of respondents scattered over a vast geographical area and few number of questions, telephonic interviewing is the best alternative.

The manner in which interviews ought to be conducted varies somewhat by survey population and sample and is also affected to some degree by the nature of survey content and context. Therefore, it is important for survey team to be fully aware of these aspects. To start with, we are going to discuss these two important points and try to be clear about their understanding, not only to be able to collect as accurate information as possible, but also to be able to make our respondent answer the questions easily and in a pleasant and comfortable way.

Introduction and Background of the Program

Benazir Bhutto Shaheed Human Resource Research and Development Board (BBSHRRDB) has been established within folds of Government of Sindh with comprehensive and long-term vision to continue addressing the twin issues of poverty and un-employment.

The Board's main division Training Program and Curriculum, Benazir Bhutto Shaheed Youth Development Program (BBSYDP) is working since 2008-09. This program has trained approx. 292,000 literates, semi-literate and literate youth (18-35 years of age) including almost 168,000 females, in a number of employable trades, out of which almost 37% have received decent employment.

This training wing is working through two streams i.e Private Sector Training Wing (PSTW) and Public Sector Training Wing (PS). For trainings under PSTW, the progress is measured in terms of achievement of milestones and fulfillment of contractual obligation by the contracted training providers. The said are validated through a Third Party Firm.

Training under Phase-VIII- Batch-I (completed batch with approx. 371 training institutes having approx. 21,453 registered trainees (male and female) and Phase-IX (ongoing training with approx. 371 training institutes having an allocation of 27,000 youth (male and female). Board intends to contract with a Firm/Company/Organization for consultancy services- third party validation of BBSYDP training programs to verify smooth implementation of the program as per approved guidelines, and to facilitate BBSYDP in validation of minimum 40% post training employment facilitation by training providers.

Rational for Validation

The researchers aim to conduct a rigorous validation of the training program. The assignment is designed to gather information from two sources i.e. desk review of documents mainly consisting of files of training providers associated with the program to offer trainings of a diversified range of trades

and telephonic interviews of trainees those have completed their trainings during phase 8 and phase 9 of the program. Both methods augment and cross validate each other

Participants in this survey were selected for government sponsored technical trainings through partnered training providers throughout the province of Sindh. The trainings have been completed after which the trainees were promised to be facilitated to look for suitable jobs as well.

The people who are called upon to participate in this survey have been preselected so that the sample is representative of the population i.e. entire pool of trainees. Participation is voluntary. Those people who agree to participate will be asked a few questions regarding the quality of training, course completion, certificate issuance, job status, etc. The data collected in this survey will give researchers a better understanding of the facts collected through desk review of documents. These data will be used to validate the training providers as recipients of grant and to improve the program further in future.

INTERVIEW GUIDELINES

General guidelines:

Some basic guidelines for interviewing are as follows:

Precautions and considerations: The interviewer's behavior should be pleasant at all times.

Since the survey mainly includes young subjects, the interviewer must be particularly patient and understanding because the youngsters might seem to be in hurry, frustrated or reluctant to talk to a stranger over the phone.

Conduct the interviews in Urdu language but do keep in mind that many of the target respondents might start speaking Sindhi. In that case, you may request to communicate in Urdu or to seek assistance of a proxy who could serve as a translator.

Many female trainees may be uncomfortable talking to a stranger male caller. Under this situation you should let the respondent talk to a female caller on the floor.

If one of the parents or some elderly person picks your call, it is best to speak slowly and distinctly. Be careful not to offer too much information which can overwhelm or confuse the subject. You should clearly request the elder to let you talk to the trainee.

Avoid using modern, technical or English language words which may seem obvious to you but may not be part of another person's vocabulary. Substitutions for some these words and phrases are listed below.

Survey → Jaaiza

Validation → Tasdeeq

Test → Imtihaan

Institute or Training Provider → Kaalij ya Idaara

Job → Mulazmat ya Naukri

Offer → Paeshkash

Trade → Koras

Satisfied → Mutma'in

Certificate → Sanad

Although it is less likely that you will find a subject with hearing problems. However, it is important that you do not assume that someone has a hearing problem when in fact he/she is having difficulty understanding the terms that You are using. Ask a few simple questions before concluding that the subject is hard of hearing. If the subject does indeed have a hearing problem, you should

- a) use a lower pitched speaking voice
- b) attempt to find out if the subject has a hearing aid and allow him/her time to get it
- c) try calling back using the handset instead of the headset

Indistinct speech is another problem. Do not assume that if a subject's speech is slurring that he/she is mentally incapacitated or perhaps not fully awake. It may be that the subject is recovering from sleep or having trouble with the physical pronunciation of the words or the subject may have dental problems which make speech difficult.

Memory problems are also reported by some persons. You will need to assess the subject's mental ability before beginning the recall. In the protocol for this survey, you will begin the interview by asking the subject whether or not he/she received the training and you will also ask for verification of his/her trade and father's name. If the subject has trouble understanding what you are asking, you may want to ask a few more simple questions before determining whether the subject is capable of responding to the interview.

Overview of Interviewer Tasks

To give you an overview of your job, the tasks which you need to perform are summarized below. All of these procedures are described in greater detail in later parts of this manual.

- make telephone contact with the trainees as displayed by the software
- attempt to find the correct telephone number of a subject if the number provided by the software is wrong
- maintain a clear and complete record of all contact attempts
- conduct the interview with the subject using the computerized interview system
- document why it is not possible to complete an interview
- verify the information that appears on the screen and correct or update if necessary

FAMILIARITY WITH QUESTIONNAIRE: Interviewers should be very much familiar with the paper-based questionnaires. For their facilitation, translation and explanation in Urdu have been discussed with them during training. Moreover, the interviewers are advised to keep the notes that they took, during the training session, with them so that they may be able to consult these in case of need.

FOLLOWING QUESTIONS WORDING EXACTLY: Follow the wording of questions in Urdu as explained during training. Changing the order or suggested wording of the questionnaire can lead the respondent to answer the question differently than is the purpose of the question.

RECORD RESPONSES EXACTLY: There are two types of questions in the questionnaires. The first type of questions is close-ended and consist of pre-identified possible responses, each of which is assigned a numeric value which should be recorded based on the answer given by the respondent. The second type of questions are open ended and mostly require very short responses. Extreme care must be taken in recording the respondent replies to ensure the accuracy of the information. Please remember to type the relevant and correct answer in case of close ended questions.

PROBING FOR RESPONSES: Sometimes respondents in an interview will give an inappropriate or incomplete answer which might be an indication that he/she is unable to understand the question. In such cases you should repeat the question using different wording or tone without affecting its meanings or a request for an elaboration can be useful.

COORDINATION AND SUPERVISION: This interview survey will be conducted by multiple callers in the team. There shall be a supervisor who will be responsible for supervising team of interviewers. In addition, a quality control monitor will randomly check and investigate any quality control issues in the light of quality control protocol and procedures.

BRIEF DATA COLLECTION GUIDELINES

- 1) Be clear as to why you are collecting data (Objectives of the project & activity).
- 2) Please check the availability and working condition of all the devices/gadgets including computer, software, I/O devices, telephone handset, headset, watch, notebook, pen, etc. as well as a hard copy of the questionnaire before starting your work.
- 3) In case of finding any of your equipment in an out of order condition or lack of resources, immediately report it to your manager and act according to his advice.
- 4) Remember that your primary job is data collection. No research method should interfere with your primary job.
- 5) Strictly follow the instructions given in the beginning of the questionnaire.
- 6) Read the consent paragraph given on the first page of the questionnaire to every respondent individually and proceed interview only after the consent of the respondent is obtained.
- 7) Check the completed form on the spot thoroughly for any errors or missing data and rectify if found so.
- 8) Please fill the form in the pre-determined order of questions so that nothing is skipped by mistake.
- 9) Maintain the performance log on a daily basis.
- 10) Further specific guidelines must be issued to each interviewer by the Manager to ensure all the above and other aspects of effective data collection that might not have been included.
